- > **Mamadou va a morire. La strage dei clandestini nel Mediterraneo.**
- > A new book about the deaths of migrants attempting the journey across deserts and the Mediterranean to reach Europe's shores. Del Grande spent months following migrants along the routes they used to attempt to breach Fortress Europe. "To forget, remove or accept as normal the immigration tragedies that are described in this book would be like allowing the victims of illegal immigration to die again. It would be even worse to consider, as some people seem to be doing, that these tragic stories may have an educational effect on the 'candidates' to become illegal immigrants."
